FOR SAFE
WORKING LIVES

A man and a woman, both wearing high-visibility work shirts and dark trousers, are walking on a construction site. The man is wearing an orange shirt and the woman is wearing a yellow shirt. Both shirts have reflective silver stripes. They are both wearing sunglasses and smiling. The man is holding a white hard hat and a yellow bag. The woman is holding a white hard hat. They are walking past a white building and a green plastic chair. The background shows a clear blue sky and a dirt ground.

When you think
safety from head to
toe, and when lifting,
hoisting or working
from heights, think...

MORE THAN JUST A SUPPLY BUSINESS

Bunzl Safety offers an integrated approach to the selection, supply, service and replacement of safety products, resulting in our ability to manage the complete life cycle of your personal and workplace safety requirements.

We also provide effective business solutions for selecting, sourcing and consolidating your site safety needs to not only achieve cost savings and efficiencies, but ensure you exceed duty of care and Safe Work guidelines resulting in safer workplaces.

BUSINESS SUPPORT SERVICES

- Site PPE assessments for eyewear, respiratory, safety footwear, hearing, hand protection and safety signage
- Product specialisation and consolidation
- Custom branding and embroidery services
- On-site workwear fitting services
- On-site vendor managed warehousing solutions and PPE vending machines
- E-Commerce and online custom catalogue solutions
- Accredited training in height safety and safe lifting/hoisting practices

LIFTING EQUIPMENT TESTING AND TECHNICAL SERVICING

Through our technical division, Robertsons Testing & Technical Services, we provide complete lifting and rigging solutions including:-

- On-site lifting and height safety inspections and testing
- Testing services in our NATA accredited laboratories
- Equipment repairs and servicing to Australian Standards
- Wire rope finishing
- Height safety installed systems
- Custom engineering of lifting beams, lifting slings and towing equipment.
- Online asset management database providing easy access 24/7 to your equipment asset history

We are NATA accredited to ISO17025 for Mechanical Testing and all technical inspectors are LEEA (Lifting Equipment Engineers Association) trained.

A man with grey hair and glasses, wearing a yellow high-visibility shirt and a safety harness, is working on a piece of equipment. He is looking to the side with a slight smile. The background shows an industrial setting with various equipment and structures.

We have over 45 years' experience in servicing a vast array of businesses from every sector across Australia including the mining, energy, heavy industrial, building and construction, healthcare, manufacturing, food processing, government and defence industries.

PRODUCT SPECIALISATION & CONSOLIDATION

While Bunzl Safety can provide a significant product range in each of our core product categories, our approach to supply, involves rationalising and consolidating products based on safety requirements.

Complexity burdens most companies. Supply chains suffer from too many suppliers, too many products, and many different systems.

Bunzl Safety can look at the Why, What, How and Where of selecting product that will keep your workplace safer while at the same time, providing efficiencies. With our tried and tested principles, supply chains can be leaner, more robust and your company can be more profitable.

BENEFITS OF PRODUCT SPECIALISATION & CONSOLIDATION

Feedback from many safety managers suggests a real need to rationalise choice and improve safety with simplified product offerings based on hazards.

THIS APPROACH HAS THREE BENEFITS:

SAFE WORKERS

A rationalised, approved product range ensures management can more easily recognise when employees are wearing or using the correct safety gear. As a result this will ensure a more compliant, safer workplace.

INCREASED EFFICIENCY

When only one or a small number of products are approved for a given task, staff members placing orders know what they require. There is no ambiguity or queries regarding item availability or appropriate certification. This not only removes uncertainty, but eliminates the potential for disputes or incorrect product being ordered, it also frees up company time to focus on core objectives and the right product being used for the correct application.

DECREASED COST

Tracking usage and expenditure on a smaller range of products is much easier and by purchasing higher numbers of the one product, typically results in reduced costs.

Like all Bunzl businesses across the world, we are experts in product specialisation and consolidation. By applying our knowledge and resources with our extensive warehousing infrastructure, we are also able to offer an efficient and effective solution for your workplace safety needs - thereby allowing you to concentrate on your core business while we focus on **safer working lives**.

SITE & PERSONAL SAFETY ASSESSMENTS

PRESCRIPTION SAFETY EYEWEAR

Inadequate or inappropriate eye protection and failure to observe occupational health and safety practices are the major causes of workplace eye injuries. Bunzl Safety will help protect your employees' vision and ensure optimal performance and comfort at work, with a custom prescription lens safety eyewear service.

ONSITE TESTING

Working with PSG Eyewear, we can service your site with the PSG Mobile onsite eye testing unit or alternatively, visit one of PSG's network of over 650 independent optometrists.

PSG provides the highest level of eye protection, while satisfying each individual's need for style and comfort. There are over 30 frames available with a variety of specialist lenses including transition, polarised and anti-fog options.

HAND PROTECTION SITE ASSESSMENTS

Through our partners Ansell, we can facilitate a full hand protection assessment at your site to enable employers to select the right gloves to improve safety, productivity and cost performance.

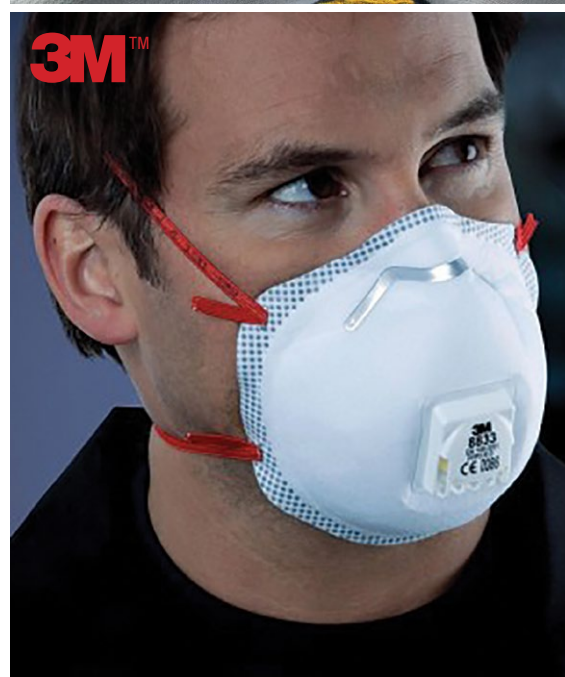

ANSELL'S GUARDIAN® PROPRIETARY SERVICE OFFERS THE FOLLOWING BENEFITS.

- Safety & Compliance
- Cost Performance
- Increased Productivity

RESPIRATOR FITTING & DUST/SILICA ASSESSMENT SERVICES

Correct fitting respirators must seal to the wearer's face in order to provide expected protection. This includes disposable respirators (also called "filtering face-pieces"). Fit testing is required by Australian New Zealand Standard AS/NZS1715 before a user wears a respirator on the job, and should be assessed at least annually.

Together with our partners 3M, Bunzl Safety can provide Respirator Fit Testing as well as Dust & Silica Testing which involves identifying respiratory hazards, evaluating exposure levels, and effective ways to control exposure

SITE & PERSONAL SAFETY ASSESSMENTS

HEARING & NOISE LEVEL TESTING

Together with our partners 3M, Bunzl Safety can provide the E-A-Rfit service program, which is designed to help validate hearing protection and compliance with hearing protection fit testing. It delivers an objective, quantitative measurement of each employee's protection, so you can better protect your workforce while helping employees understand the importance of correctly fitting the right earplugs for the surrounding work environment.

SITE SAFETY SERVICES & LOCK OUT/TAG OUT KITS

Creating a visually safe workplace is crucial for site safety and must comply with Australian Standard Safety requirements. Bunzl Safety and Brady will come to your site to assess potential dangers and provide recommendations on appropriate signage and tags for the workplace.

We assess whether or not your signage supports your current work site procedures and requirements. All your hazardous areas are clearly identified and the site requires lockout/tagout equipment.

SAFETY FOOTWEAR SITE AUDITS

The high prevalence of foot problems in workers that wear safety footwear is a serious concern for both worker welfare and workplace productivity.

BUNZL SAFETY CAN PROVIDE SITE AUDITS BY OUR QUALIFIED PODIATRIST AND DOCTOR OF BIOMECHANICS FOCUSING ON:-

- Claims History
- Hazards Workforce Characteristics
- Terrain Assessment
- Movement Analysis
- Footwear Recommendations

Assessment should result in a short list of styles approved for each job task.

CUSTOM EMBROIDERY BRANDING & CLOTHING FITOUTS

At Bunzl Safety we understand the importance of a good uniform, and how it supports your brand as well as protecting your workers.

We also understand the importance of offering an integrated service for uniforms complete with quality embroidery services and tailored online ordering for your staff.

Our experienced customer service and embroidery staff provide embroidery, screen printing, additional taping and alterations to your uniform orders according to your individual company needs. We will co-ordinate all aspects of this service, from logo and employee name set up, through to artwork approvals, required customisations and order delivery.

We can also provide custom branded* PPE items such as hard hats, safety eyewear and gloves. Our fast turnaround times and quality embroidery / screen printing machines ensure you and your staff are safe and looking professional in no time!

*Minimum order requirements apply.

FITTING SERVICES

Your staff presentation says a lot about your company and a large part of this is ensuring their uniforms fit correctly.

With our **free** onsite fitting service for larger customers, we will go to site and co-ordinate individual clothing fit-outs with staff to ensure correct fit and selection relevant to the job task and environment.

Our expert staff can also advise on necessary safety workwear guidelines and standards, as well as garment maintenance.

E-COMMERCE SOLUTIONS

Bunzl Safety is the market leader in custom online ordering of PPE, workwear and safety equipment, and have invested in the latest technologies to ensure our customers have control over uniform and site safety expenditure. We also have the capability to offer full 'punchout' integration to our customer's computer system if desired.

Our cutting edge e-commerce technology allows you to seamlessly add online ordering to your business, so that employees can order online from a mobile, tablet or PC.

Our fully integrated custom online catalogues/portals can display required products with a tailored user interface including custom embroidery and approval processes.

We also streamline the order and dispatch process to ensure your staff are not wasting valuable time with uniform and size selections, order recording, submitting requisitions and so on.

WE OFFER:

- Custom Online Catalogues/Portals
- EDI (Electronic Data Interchange) Integration
- Full Punch-Out Capabilities

Many large organisations with multiple staff and locations utilise our e-commerce capabilities to ensure faster, more efficient and cost effective ordering capability, particularly for their PPE and uniform requirements.

FUNCTIONALITY AND FEATURES

- Extensive range of products – you select which product you want your employees to access
- Easy access to previous order history
- Manage individual employees budgets by category
- Flexible Order Approval processes
- Scope for multiple levels of ordering authority
- Geotrust secured
- Access Online Specials
- Display dollar value or point values for staff
- Product Feature Filtering
- Custom Order Templates
- View order status and pay outstanding invoices online
- Email confirmation of order placement & dispatch
- Compatible with PC, Tablets or Smart Phones
- 24/7 access to reports and orders
- Full integration into your inventory system to ensure real efficiencies and no double ordering.

VENDOR MANAGED INVENTORY SOLUTIONS

VENDOR MANAGED INVENTORY CONTROL OPTIONS

Bunzl Safety offers many ways to manage your safety equipment securely on-site.

Providing supplies and safety equipment at the point of use provides several benefits:

- Productivity increases due to less walking time to central stores and warehouses
- Software captures all transactions, providing business intelligence and reducing manual paperwork
- Machines offer configurable, accessible storage easily
- Auto-replenishment saves order processing expense and keeps items in stock

CONTAINER SHOP

The on-site container shop enables convenient and immediate access to workwear, PPE and other safety equipment. A fitting area for uniform fittings can also be provided within the container if required. The container shop maintains peak efficiency with a service that brings equipment for the job to your site.

ON-SITE VENDING SYSTEMS

Our on-site vending options include models that contain coils to dispense gloves, earplugs, and any carded or single-use packaging, or weight-sensitive storage for all bin stock components.

TOOLBOX COIL VENDING

The ToolBox Vending Machine includes a full computer touch screen. Employees can search for items that may be located in the current machine or another vending machine onsite.

It also enables receipt of purchase orders at the device and delivers a flexible dispensing layout which allows a wide range of products to be dispensed.

WEIGHSTATION VENDING

To allow for bulkier items, we also offer the WeighStation vending machine, which uses advanced patented scale and bin technology to immediately sense when an item has been removed or returned into a bin.

This device allows for a highly flexible design to be achieved.

POU KIOSK

The POU Kiosk can be installed within the container shop to deliver a portable store solution. The POU Kiosk delivers full inventory management functionality and uses Telstra's proven 3G and 4G networks to provide the best wireless connectivity available.

CM MOBILE PLUS APPLICATION

CM Mobile Plus is an iOS application that allows users to perform scanner functions using a Smart phone or iPad.

LIFTING EQUIPMENT TECHNICAL SERVICES

LIFTING EQUIPMENT ASSET MANAGEMENT CYCLE

FOR OVER 45 YEARS, OUR TECHNICAL DIVISION, ROBERTSONS TESTING & TECHNICAL SERVICES HAS PROVIDED EXPERT LIFTING EQUIPMENT SERVICES TO INDUSTRIES THROUGHOUT AUSTRALIA.

All technical services comply with current Australian Standards and we employ fully trained and certified inspectors, technicians, and installers to ensure safety compliance and fast turnaround times.

HOW THE TECHNICAL SERVICE AND ASSET MANAGEMENT PROCESS WORKS

LIFTING EQUIPMENT INSPECTION SERVICES

To save on down time bringing lifting and safety equipment to our laboratory, our fully LEEA qualified inspectors can travel to site to undertake the necessary monthly, quarterly or yearly inspections. Alternatively, lifting equipment can be dropped off at select Bunzl Safety branches for the required inspection.

Just some of the equipment our inspectors can inspect and test include:-

- Hoists & wire rope
- Chain & synthetic slings
- Rigging hardware & lifting beams
- Work boxes and goods cages
- Harnesses, lanyards & confined space equipment

SERVICE ACCREDITATIONS

We currently hold the following accreditations:

- NATA ISO17025 for Mechanical Testing
- Full LEEA (Lifting Equipment Engineers Membership Assoc.) Accredited

The LEEA Team Card is your guarantee that the inspector has been correctly trained and accredited by LEEA.

OUR ADVANCED ELECTRONIC INSPECTION & ASSET MANAGEMENT SYSTEM

The Bunzl Safety Electronic Inspection System is an advanced lifting equipment asset management system that allows customers to view their lifting equipment securely on-line at any time.

The system involves inspectors using an a smart device to carry out onsite inspections and upload data electronically to the database.

Equipment Registers, test certificates and results can then be easily accessed by the customer - at anytime.

Our Electronic Inspection System ensures greater accuracy and speedier access to inspection reports.

Customers can access reports, asset lists and certificates at any time.

For over forty five years our Robertsons Technical Services Division has been dedicated to first class, competitive service and continual innovation - it's what sets us apart from our competitors.

NATA ACCREDITED TESTING, REPAIR & ENGINEERING SERVICES

IN-HOUSE OR MOBILE TESTING & REPAIRS

With NATA accredited testing capacity to 1,000 tonnes in-house and 35 tonne capacity mobile test machines, we have the facilities and expertise to test a broad range of lifting and rigging equipment.

As with equipment inspection results, test results can be added to the Bunzl Safety Electronic Asset Database, which can be securely accessed at any time by our customers.

Our experienced technicians can also service or repair lifting and rigging equipment both on-site and offsite and we pride ourselves on offering quick turnaround times on all gear sent back to our workshops for repairs.

Most Bunzl Safety branches have NATA accredited repair and test laboratories to ISO 17025 for maintaining lifting and safety equipment, as well as both proof load and destruction testing services being available.

Our full NATA accreditation also ensures that all lifting equipment tested by Bunzl Safety is in accordance with the relevant Australian Standards and independently audited to international laboratory testing guidelines.

ENGINEERED & MANUFACTURED PRODUCT

At Bunzl Safety we understand that some heavy lifting and towing applications require custom requirements and expert technical know-how to deliver the safest, yet cost effective solution.

We have full time engineering staff and quality assured manufacturing facilities for the design, manufacture and testing of equipment for those specialised applications.

CUSTOM DESIGNED AND MANUFACTURED LIFTING PRODUCTS (MADE IN ACCORDANCE WITH AS4991 AND OTHER RELEVANT AUSTRALIAN STANDARDS) INCLUDE:

- Spreader bars, C hooks and gantry crane systems
- Synthetic, chain and wire rope slings
- Height safety systems
- Forklift jibs, work platforms and goods cages
- Scissor clamps and drum handling equipment.

OUR EXPERT ENGINEERING STAFF CAN ALSO UNDERTAKE:

- Proof load testing
- Lifting studies, crane assessments and incident reports
- Design and assessment of height safety systems

We offer both in-house and mobile NATA accredited testing of a broad range of lifting and rigging equipment.

HEIGHT SAFETY INSTALLED SYSTEMS & ACCREDITED TRAINING

HEIGHT SAFETY INSTALLED SYSTEMS

It is a requirement by law, that those people in control of a building must ensure that safe access is provided to all areas where a person is required to work, including areas where a person may fall. This responsibility covers employees, visitors and contractors.

The team at Bunzl Safety are highly experienced at designing and installing Height Safety Systems and can work with owners and managers to ensure all needs and compliances are met.

OUR TRAINED ENGINEERS, CONSULTANTS AND CERTIFIED INSTALLERS CAN INSTALL SYSTEMS STRICTLY TO MANUFACTURER'S SPECIFICATIONS AND TECHNICAL REQUIREMENTS, INCLUDING:

- Horizontal static lines
- Anchorage points
- Ladder systems and walkways

BUNZL SAFETY HAS INSTALLED MANY HEIGHT SAFETY SYSTEMS IN DIVERSE APPLICATIONS, FOR CLIENTS SUCH AS:

The Story Bridge Adventure Club, The Australian Defence Force, various councils and powerstations nationally, high rise apartments and commercial office buildings.

ACCREDITED TRAINING SERVICES

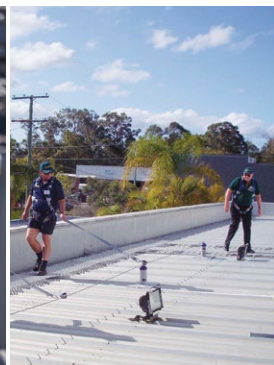

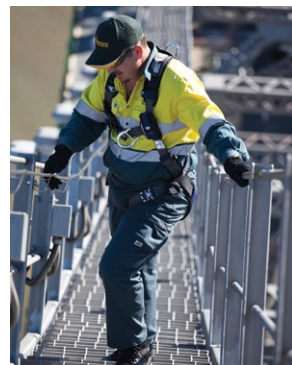

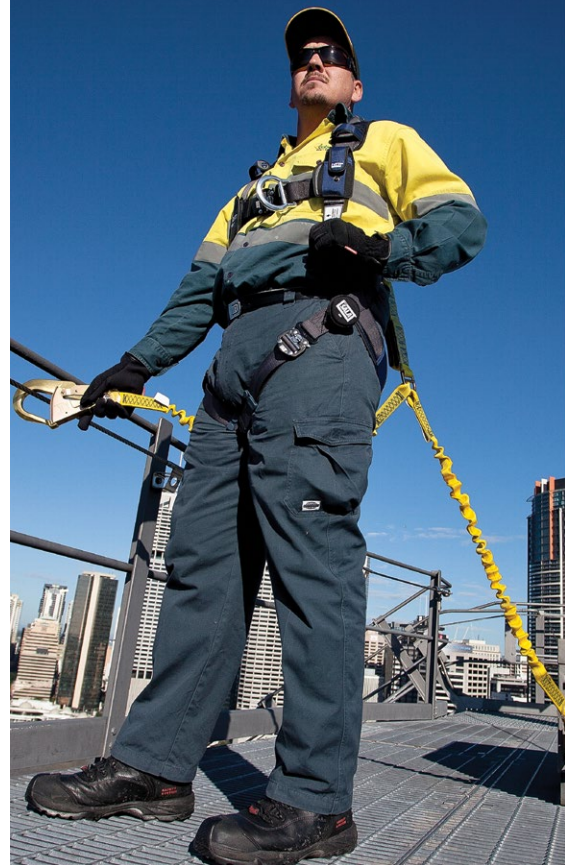

We offer nationally recognised competency based training courses in height safety.

Courses such as the basic use and maintenance of height safety systems, fall arrest training, confined space and rescue techniques and the use of breathing apparatus can be provided at specially equipped training facilities or at a customer's site.

Bunzl Safety also offers hands-on product training through our mobile trailers on a periodic basis by request.

SOME OF OUR POPULAR COURSES OFFERED INCLUDE:

- Height Safety Operator
- Working Safely at Heights (WSAH) - including Rescue
- Height Safety Refresher
- Enter Confined Space
- Confined Space Non Entry Rescue Techniques)
- Transfer of Loads
- Operation of Gantry or Overhead Crane
- Underground Lifting Operations.
