LIFTING EQUIPMENT INSPECTION SERVICES

To save on down time bringing lifting and safety equipment to our laboratory, our fully LEEA qualified inspectors can travel to site to undertake the necessary monthly, quarterly or yearly inspections.

Alternatively, lifting equipment can be dropped off at select Bunzl Safety branches for the required inspection.

Just some of the equipment our inspectors can inspect and test include:-

- · Hoists & wire rope
- · Chain & synthetic slings
- · Rigging hardware & lifting beams
- · Work boxes and goods cages
- Harnesses, lanyards & confined space equipment

SERVICE ACCREDITATIONS

We currently hold the following accreditations:

- NATA ISO17025 for Mechanical Testing
- Full LEEA (Lifting Equipment Engineers Membership Assoc.) Accredited

OUR ADVANCED ELECTRONIC INSPECTION & ASSET MANAGEMENT SYSTEM

The Bunzl Safety & Lifting Electronic Inspection System is an advanced lifting equipment asset management system that allows customers to view their lifting equipment securely on-line at any time.

The system involves inspectors using an a smart device to carry out onsite inspections and upload data electronically to the database.

Equipment Registers, test certificates and results can then be easily accessed by the customer - at anytime.

The LEEA Team Card is your guarantee that the inspector has been correctly trained and accredited by LEEA.

Our Electronic Inspection System ensures greater accuracy and speedier access to inspection reports.

Customers can access reports, asset lists and certificates at any time.

NATA ACCREDITED TESTING, REPAIR & ENGINEERING SERVICES

IN-HOUSE OR MOBILE TESTING AND REPAIRS

With NATA accredited testing capacity to 1,000 tonnes in-house and 35 tonne capacity mobile test machines, we have the facilities and expertise to test a broad range of lifting and rigging equipment.

As with equipment inspection results, test results can be added to the Bunzl Safety & Lifting Electronic Asset Database, which can be securely accessed at any time by our customers.

Our experienced technicians can also service or repair lifting and rigging equipment both on-site and offsite and we pride ourselves on offering quick turnaround times on all gear sent back to our workshops for repairs.

Most Bunzl Safety & Lifting branches have NATA accredited repair and test laboratories to ISO 17025 for maintaining lifting and safety equipment, as well as both proof load and destruction testing services being available.

Our full NATA accreditation also ensures that all lifting equipment tested by Bunzl Safety & Lifting is in accordance with the relevant Australian Standards and independently audited to international laboratory testing

ENGINEERED AND MANUFACTURED PRODUCT

At Bunzl Safety & Lifting we understand that some heavy lifting and towing applications require custom requirements and expert technical know-how to deliver the safest, yet cost effective solution.

We have full time engineering staff and quality assured manufacturing facilities for the design, manufacture and testing of equipment for those specialised applications.

CUSTOM DESIGNED AND MANUFACTURED LIFTING PRODUCTS (MADE IN ACCORDANCE WITH

AS4991 AND OTHER RELEVANT AUSTRALIAN STANDARDS) INCLUDE:

- · Spreader bars, C hooks and gantry crane systems
- · Synthetic, chain and wire rope slings
- · Height safety systems
- · Forklift jibs, work platforms and goods cages
- · Scissor clamps and drum handling equipment.

We offer both in-house and mobile NATA accredited testing of a broad range of lifting and rigging equipment.

ADDITIONAL TECHNICAL SERVICES

HEIGHT SAFETY SYSTEMS - INSTALLATION AND RE-CERTIFICATION

The team at Bunzl Safety & Lifting are highly experienced at designing and installing Height Safety Systems and can work with owners and managers to ensure all needs and compliances are met.

Just some of the height safety systems we have installed include those for the Australian Defence Force, various local Councils, the Brisbane Story Bridge Climb and various commercial buildings and powerstations nationally.

Our trained engineers, consultants and certified installers can install systems strictly to manufacturer's specifications and technical requirements, including:

- · Horizontal static lines
- Anchorage points
- Ladder systems and walkways

PALLET RACKING INSPECTIONS

To comply with WH&S laws, it is vital to have your racking inspected by a qualified person at least every 12 months.

Often damage to racking may not be obvious or can be hidden from the untrained eye.

Our experienced inspectors can undertake thorough checks and provide a report detailing any damage and

recommended actions to ensure you comply with Australian Standard AS 4084:2012.

BA & GAS DETECTION SERVICING

At Bunzl Safety & Lifting we can offer our clients breathing apparatus and gas detection inspections, certification and servicing. The onsite service includes hand held personal gas detectors and 180 day recallibration as well as breathing apparatus testing.

FIRE EXTINGUISHER TESTING

Fire extinguishers are relatively simple devices to use. However, there are differences between them in terms of the elements contained within and where they should be applied. Fire extinguisher testing is necessary regularly and our Field Testing Officers an inspect the units, assess the surrounding environment and provide any maintenance required.

SOLAR PANEL CLEANING

Finally, our Technical Division can provide solar panel cleaning to the highest industry standard, ensuring your solar unit operates at peak working performance.

For any of the above services please contact our Technical Services team on 1800 967 573.
