SPECIFICATION SHEET

TUFFGARD® BROADBRIM HARD HAT

TUFFGARD® Broad Brim

A NEW ERA in broad brim hard hats!

Sureguard Safety Australia has developed a BRAND NEW, innovative design for broad brim hard hats. The new design includes greater protection from the elements including a 60% increase in brim area and 30% more protection, compared to current Broad brim designs and 300% more brim area than a standard peak cap.

The new TUFFGARD® BROADBRIM hard hat has a unique removable access tab to allow for cap attachable helmet ear muffs. These tabs can be parked in the rear of the hard hat to prevent loss.

The new TUFFGARD® comes in both A.B.S. and POLYCARBONATE materials including solid colours and the patented CLEARVIEW® range of colours.

Australian owned, Australian designed and Australian Manufactured!

TYPE 1 or TYPE 2

- **TYPE 1** hard hats are made from lightweight, high impact rated ABS. This hard hat is suited to most everyday applications that are not heat related. Type 1 is the most common hard hat for construction and general head protection from impacts
- **TYPE 2** hard hats are made from high impact rated polycarbonate. This hard hat is suited to high heat applications like smelters and foundry works. Type 2 hard hats should be worn where there is a risk of exposure to high heat and fire

FEATURES & BENEFITS

- The improved modern design of the attachment slot allows the TUFFGARD® BROADBRIM helmet to accept most 25mm and 30mm attachments that are in the marketplace (cap attachable earmuffs).
- Certified Australian design and manufacture for trusted and reliable head protection.
- Available in Polycarbonate or A.B.S. (Vented and Non-Vented).
- Extra strong and robust yet light-weight, ideal for all working conditions.
