

SIZE GUIDE

Place feet on size chart to determine the shoe size you require*

***Sizing stated is mens UK sizing**

To convert to ladies sizing add 2 sizes to the mens UK sizing (.ie. Size 4 UK mens is approximately a size 6 ladies).

Measure both feet and select the size past your longest toe on the largest foot. Always allow for socks.

Please note: This is a guide for foot length only and is not a substitute to trying on the footwear. The size guide cannot take into account foot width or depth which will alter the fitting of the footwear.
